Description

Mercury Racing produces the through hub exhaust Cleaver for 40 - 60 HP outboards designed to run high for maximum speed. The Cleaver works best with light weight hulls primarily cats or tunnels and limited use with vee bottoms.

The stock finish offers excellent performance for those light weight natural lifting boats.

SPECIFICATIONS

Diameter 11", 11.50" & 12"
Pitch 14" - 22"
Rotation RH
Finish Stock

APPLICATIONS

- Designed to run 45 to 65 offering minimal bow lift
